

CLEAN FOOD GRADE SYSTEMS WHILE RUNNING PRODUCTION

OVERVIEW

Meeting the specifications of FDA 21CFR 172.878 for incidental food contact, DELF Clean FG is a long life, preventative maintenance and light duty system cleaner, in addition to functioning as a long term heat transfer fluid. DELF Clean FG is the perfect preventative maintenance tool for processors requiring a food grade system cleaner. It is capable of running in systems up to 550°F, is odorless and easily handles long term operation while seamlessly allowing production to continue uninterrupted for a complete oil cycle.

DEL F Clean FG IS THE FIRST AND ONLY FOOD GRADE, NO DOWNTIME SYSTEM CLEANER THAT UTILIZES THE LATEST IN ADDITIVE TECHNOLOGY.

DEL F Clean FG is the ideal system cleaner and perfect preventative maintenance tool. Capable of running in systems up to 550°F, it is odorless and easily handles long term operation while seamlessly allowing production to continue uninterrupted.

Compatible with most system fluids it will effectively dissolve and consume sludge and carbon build-up in minimal time but remains effective and can stay in the system for a full oil cycle. Simply fill a system and run production as usual.

Typical Properties	DEL F Clean FG
Maximum Use Temperature	550°F
Viscosity cSt @ 104°F	44.6cSt
Viscosity cSt @ 212°F	7.0cSt
Flash Point °F	465°F
Fire Point °F	497°F
